Content

Requirements.

- Windows 10
- +8GB RAM
- +120GB hard drive
- OpenGL3.3X+

Getting Started

1. Locate in the "Release" folder.
2. Select the JURASIC3D.exe app.
3. Run by double-clicking or with the ENTER key.
4. Wait (a few minutes) for it to run.
5. With the W, A, S, D keys you can move the camera.
6. Once inside click on the window and you can scroll by pressing the ALT LEFT key twice to lock the pointer and improve the direction of the camera.
7. If you want to activate the cursor again to exit press the ALT LEFT key again.
8. If you want to move with the camera press the key 1 for normal mode, 2 for speed x10 or press 3 for speed x100.
9. If you want to activate the lights of the lamps in the room press the space bar. This in turn activates the light found in the volcano.
10. If you want to finish or exit, press the ESC key or from the window with the

    pointer over the X icon to exit.

Ready! Now you can interact with this mini world, have fun.

EXECUTION ERROR

Failures occur before or during execution may be due to failure to meet requirements or RAM does not have enough space to run the application.
